

AE #659

**READ AND FOLLOW ALL DIRECTIONS
AND CAUTIONS CAREFULLY
BEFORE USING THIS PRODUCT**

This drain opener uses extremely powerful caustic granules activated with aluminum needles. When added to water in a drain or sewer, it releases tremendous amounts of heat and turbulence to liquefy, dissolve and loosen animal and vegetable fats and oils, hair, paper, organic matter and other materials that clog drains and sewer lines.

DIRECTIONS

MUNICIPAL: Pour or shovel 20 pounds into strategic manholes. If sewer system is dry, pour water down manhole after the drain opener has been added.

INDUSTRIAL: Use 1 to 2 pounds in normal drains. In food plants such as packing houses, canneries, etc., where accumulations of grease or organic matter is high, dosages of 3 to 5 pounds are recommended.

WARNING: Use of this drain opener generates considerable heat which may cause eruption of hazardous liquid contents. NEVER use a plunger with this product. Add slowly to drain or manhole. Never look into drain after treating. Place a bucket or other deep container over drain opening after treatment.

Do not use in combination with or directly after treatment with acid type drain openers, as it will react violently. Do not enter treated sewers until they have been thoroughly flushed out with water.

SEWER SOLVENT 99
